SMART-CONNECT

TSOC has developed an innovative modular low voltage cabling solution incorporating zone cabling design. Factory terminated, tested, and labelled Bundled Trunk Cables are designed to be plugged in between the Patch Panel in the telecom room and strategically placed Consolidation Points in the work area. Individual Cable Whips are connected between the Consolidation Point and Work Area Outlet or directly to an end point device. This "Plug & Play" zone cabling design can help simplify and reduce deployment by more than 50%, eliminating time consuming field termination, testing, and labelling. Smart-Connect™ ensures a predictable and repeatable technology rollout and makes post installation service calls quick and easy. This is a Made in Canada solution with a 40 Year Warranty.
